Transforming HR Operations in Healthcare with Kleeto.

## INDUSTRIES CONTEXT

Large hospital chains manage thousands of employees across multiple locations. Paper-based records and fragmented HRIS usage often lead to inefficiencies, compliance risks, and poor employee experience.

**Industry:** Healthcare Services
**Geography:** Hospitals across India
**Scale:** : Large, distributed, multi-location employee base

## BUSINESS CHALLENGES

- Fragmented Records – Paper files across branches
- Underutilized HRIS – Not fully leveraged
- Compliance Risks – Manual, error-prone audits
- Operational Inefficiency – HR teams bogged down in paperwork

**Transforming HR in Healthcare: - Kleeto + The Hospital**

**THE KLEETO SOLUTION**

- **Digitization** @ Secure, centralized employee files
- **Integration** @ HRIS modules fully utilized
- **Automation** @ Faster onboarding, verification, audits
- **Compliance** @ Digital records meet healthcare regulations

## WHY IT MATTERS FOR ANY OTHER HEALTHCARE ORGANISATION

- Efficiency Gains – No paperwork, faster HR workflows
- Compliance Confidence – Audit-ready at all times
- Employer Branding – Modern HR attracts top talent
- Cost Savings – Reduced storage, errors, and manual effort

## PROCESS FLOW ENABLED

- Employee documents digitized and uploaded to a centralized system
- Access permissions defined by role and hospital location
- HR teams access only compliant and approved records
- All actions logged automatically for audits
- Consistent document governance across all hospitals

This automation eliminated manual follow-ups and ensured payroll-ready employee records from day one.
